SKILLS

Technical: Java, SQL, Python, React.js, Next.js, C++, Machine Learning

Tools: Git, Github, Linux, Scikit-learn, Kaggle, TensorFlow

EDUCATION

- ❖ Computer Science and Engineering| Siksha 'O' Anusandhan(ITER) **CGPA:** 9.92 | (Sep'23 - June'27)
- ❖ XII (CBSE) | Netaji Centenary School 91.2% | 2023

PROJECTS

- **VisualPe** - A React.js-based financial dashboard that enables users to track investments and cashflow, visualize portfolio performance, and monitor expenses and returns through clear, interactive data insights
- **CodeBuzz** - An AI-powered competitive coding platform built with Django, Google Gemini, and MediaPipe/OpenCV. It provides real-time camera proctoring for fair contests, offers company-tagged premium problem sets, and delivers AI-generated step-by-step solution guidance to improve interview preparation
- **XraySetu** - Developed an AI-driven X-ray diagnosis platform integrating a TensorFlow-based deep learning model for medical image inference. Designed the backend using Django REST Framework with secure image handling, authentication, and API endpoints. Built a responsive Next.js frontend for visualization of diagnostic reports and confidence scores

ACHIEVEMENTS

- Solved 100+ DSA problems on [Leetcode](#)
- Ranked 6th in HackOdisha 4.0 by NIT Rourkela among 800+ teams
- Ranked 6th in HackEnigma Hackathon at ITER among 300+ teams
- Qualified for Smart India Hackathon(SIH) 2025

EXPERIENCE

- ❖ **Member | Google Developer Student Clubs, SOA(ITER)** (Dec'24- Present)
Organised Coding Contests,Hackathons
